.....

To the Chairman and Members of the
Kempston Urban District Council

Mr. Chairman, Ladies and Gentlemen,

I was concerned with the health of the District for only the last two months of the year.

The general health of the District remained good and the statistics were satisfactory. It is difficult to draw any conclusions from these figures as the numbers are so small.

Information is given regarding the provision of Health Services in the area.

I am grateful to you, Mr. Chairman, and to the Members of the Committee for the interest you have shown in the work of the Department and also to Mr. Bentham who has been responsible for most of the work described in this report.

I am,

Your obedient Servant,

G. R. THORPE.

Medical Officer of Health.

KEMPSTON URBAN DISTRICT COUNCIL

A N N U A L R E P O R T
of the
MEDICAL OFFICER OF HEALTH
for 1966

.....

1. STATISTICS OF THE AREA.

Area in Acres.	1,302
Registrar General's estimate of mid-year population, (including Service Personnel).	11,080
Number of inhabited houses at end of year according to Rate Book.	3,486
Rateable Value (1st April 1966).	£477,879
Sum represented by a Penny Rate.	£2,057

2. SOCIAL CONDITIONS.

Kempston is attracting an increasing amount of industry and commerce, particularly on the Chantry Road Industrial Estate. The number of houses completed is partly reflected in the steady rise in population.

5. SANITARY CIRCUMSTANCES OF THE AREA

(a) Water Supply

The North Bedfordshire Water Board is responsible for the water supply which is piped to all parts of the district. Complaints were again received regarding the unpalatable condition of the water, although there was no question of the water being impure.

(b) Drainage and Sewerage

Apart from fifteen premises situated in outlying parts of the District, all dwelling houses are connected to the public sewers.

(c) Sewage Disposal

All samples of final effluent from the Council's Sewage Disposal Works were of a satisfactory standard.

Investigations were made into several systems of applying deodorizers to the sludge lagoons to prevent occasional smell nuisance which arises during the summer months. Spraying of the lagoons with deodoriser is to be carried out during the summer of 1967. Consideration is being given to methods of sludge treatment to permanently alleviate this problem.

(d) Rivers and Streams

No action was necessary in relation to the pollution of rivers or streams.

(e) Public Cleansing.

The first phase of the paper sack storage system of refuse was inaugurated during the year, resulting in approximately one half of the houses in the district being converted to this more hygienic system. Next year will see the remainder of the district converted to the use of paper sacks.

(f) Sanitary Inspection of the Area.

The following Table shows the number of inspections made for all purposes:-

(g) Clean Air Act 1956

Two cases of emissions of industrial dark smoke were recorded during the year. These were both satisfactorily dealt with by informal action.

Four applications for Prior Approval under the Act were received in respect of new boiler installations. Three of these applications were approved after the owners had agreed to recommendations made by the department. It was not found possible to approve the fourth installation, although certain improvements to the original proposals were secured.

(h) Swimming Baths and Pools

There is one swimming pool within the district, situated at the Balliol Road Junior School. Samples of water are taken by an officer of the County Council. All of these samples proved to be satisfactory.

(i) Petroleum Regulations

The total number of licences in force at the end of the year was 26 in respect of petrol installations.

(j) Rag Flock and Other Filling Materials Act 1951

One premises is registered under this Act.

(k) Disinfections

It was not found necessary to carry out any fumigations following infectious disease.

(l) Scrap Metal Dealers Act 1964

Three persons, two with premises within the District, are registered as Dealers in Scrap Metal.

(m) Slaughterhouses

There is one private licensed slaughterhouse in the District.

6. INSPECTION AND SUPERVISION OF FOOD.

(i) Meat Inspection

All the meat from animals slaughtered at the Ampthill Road Abattoir is inspected by the Council's Inspectors in accordance with the Regulations.

The incidence of *Cysticercus Bovis* although slightly lower than last year, was still above the national average.

The following table summarises inspections and condemnations for the period 1st January 1966 to 31st December 1966:

(ii) Food Hygiene Regulations.

The standard of hygiene in food premises within the District is now at a fairly satisfactory level. Works were found to be necessary in some premises and with one exception these were carried out by the occupiers after notification by the Department. The exception referred to was a Bakehouse in respect of which the Owner had previously been prosecuted by the Council. It was not possible to secure the co-operation of the Occupier and once again legal procedure had to be instituted. The Magistrates fined the defendant a total of £20 (Twenty Pounds) with one month imprisonment for non-payment.

TOTAL	11 tons	1 cwt.	40 lbs.
	<hr/>		

(iv) Unsound Food.

All complaints of unsound food are investigated and the findings are tabulated as follows:-

Article of Food.	Nature of Complaint.	Complainant.	Action Taken.
Cottage loaf	Souring	Private Person via Weights & Measures Dept.	Bread examined by Council's Inspectors which was found to be in a sound condition. A strong smell of yeast normal in this type of bread, had been confused with the complaint of souring.
Pork Pie	Hairs & skin in meat substance.	Private Person	Pie examined by Council's Inspector. Hairs and skin found to be from the pig. As this pie was purchased from a Bedford store, the matter was referred to the Bedford Borough Public Health Inspector and a warning letter was sent to the Vendors.
Bags of Sugar	Contamination with hair-like material.	Private Person via Bedford Borough Public Health Dept.	Matter investigated at source with the co-operation of the Dunmow R.D.C. Public Health Dept. Contamination found to be coming from jute sack hairs which became dislodged when screens were removed for cleaning. Manufacturers erecting a new silo which will make the storage of sugar in jute sacks unnecessary. Warning letter sent to the Manufacturers.

7. HOUSING.

(a) New Dwellings.

The following table shows the number of houses completed for occupation since the end of the second world war:-

1966	38	-	142	180
TOTALS	566	112	940	1,618

(b) Inspection of Dwelling Houses.

By the end of the year the Council's five year Slum Clearance Programme which was commenced in November of 1964, was nearing completion.

A Compulsory Purchase Order was made in respect of 38 houses and land at Up End. Nine of these houses were considered to be fit, the remaining twenty-nine were included in six separate clearance areas titled Up End Clearance Areas 1 to 6 respectively. Although Compulsory Purchase powers were sought by the Council it was possible to secure the purchase of most of these houses and land by agreement.

In December a further ten houses in Cater Street were under consideration for action under the Clearance Area procedure and it is likely that a Clearance Area will be declared in respect of these houses in 1967.

8. PREVALENCE AND CONTROL OF INFECTIOUS DISEASES:

Disease	Notification by Age Groups				Removed to Hospital
